Taised. The present strength of the army is 593,000.

There will be no numbers drawing for the draft. The birth date is the big factor in determining which men will be called to duty. Selective service said it will have the first draftees processed and on their way to induction centers in mid-September.

From there, the army plans to send them to training centers at Ft. Dix. N. J., Ft. Knox, Ky., Ft. Riley, Kas., and Ft. Ord. Calif., for the 14 weeks of basic training. Generally speaking, the army said, inductees will be sent to the center nearest their home. They will get the same training as enlistees and volunteers and will be given the same opportunities for advancement.

On completion of training, each draftee will receive a week's furlough before his assignement to a post in the United States. Draft boards throughout the na-
